

### What's the project about?

The Erasmus+ project “ID GAMES- Co - Create assistive games for people with Intellectual Disability (ID) to enhance their inclusion” is based on the belief that each person should be given the chance to be accepted, valued and have equal opportunities to develop their skills and personality.

#### The “ID GAMES” project aims to:

1. **increase social inclusion** of people with ID by fostering equity, live involvement and cooperation between them, their educators, their carers, university students, game designers and other people from local community
2. **decrease stigma and victimization** of people with ID and their caregivers
3. **strengthen the professional profile of educators and professionals**, through training workshops, mobilities and new training tools, so that they will be able to use and create serious games
4. **create 6 innovative serious games** (physical, digital, phygital) treating social and practical limitations of people with ID as well as a methodology for creation of serious games, adapting them and implementing in the specific group
5. **create digital tools** (e-course, e-platform, games) that enhance the sustainability of the project's aims

"It energizes us and enlivens us. It eases our burdens. It renews our natural sense of optimism and open us up to new possibilities"
